Dolphin

A smart venue reservation assistant, developed by using Compose Desktop

⚠ Warning

This project is for **educational purposes only**. This repository does not provide any script services or automation tools.

📋 Features

- 📅 **Smart Reservation:** Easily book venues with a few taps.
- ⏱ **History & Quick Start:** Automatically saves your reservation configurations (as seen in the "Empty History" state) for one-click re-booking.
- 🎨 **Material Design 3:** Customize the application theme to your liking.
- 🌙 **Dark Mode:** Fully supported dark theme for comfortable night usage.

♥ Thanks

This project is built with the help of these amazing open-source libraries and resources:

- [Compose Multiplatform](#)
- [Material Design 3](#)
- [ColorPicker](#)
- [MaterialKolor](#)
- [PreCompose](#)
- [MPFilePicker](#)
- And many other open-source libraries.

Special Credits:

- 🎨 UI Design inspired and guided by **Gemini 3 Pro**.
- 🖼 Icons provided by [Icons8](#).
